EXPERIENCE

• Ecom Express Limited

Software Developer -1

Gurugram, Haryana

July 2024 - PRESENT

- Integrated OSRM distance api which brought the cost of the operation by 30%.
- Replaced libraries using NDK with other third-party libraries which decreased apk size from 55 m.b. to 25 m.b.(43%).
- Worked on Live tracking feature which tracks Field Executive when they are out for delivery.
- Developed application which helps delivery centers to keep record of damaged or missing packages.

Associate Software Developer

January 2023 - July 2024

- Migrated application from XML view-based system to Jetpack compose view-based, resulting in a 20% decrease in code complexity and improving the responsiveness of layout by 15% across various devices.
- Replaced deprecated code making the application with compatible Android 14 increasing user by 5%.
- Integrated ML kit face detection api which prevents user to upload incomplete images for their face.
- Developed and published an onboarding application on play store achieving 100000+ Downloads.

Graduate Trainee Engineer

June 2022 - January 2023

- creating POC for new small features that can be incorporated later on the existing application and improve performance.
- Analyzing and understanding the architecture and other important aspects of existing codes to incorporate changes in the application writing new codes as required.
- Providing support and contributing to the development of several applications.
- Learned about agile methodology and git commands and operations.

• Unthinkable Solutions

Software Developer Intern

Gurugram, Haryana

February 2022 - June 2022

- Communicate with clients and understand their requirements for the application.
- Analyzing existing codebase and adding new features as required.
- Responsible for delivering the application with requested modifications and resolved bugs.
- Worked as a single resource in an application as a fullstack developer

PROJECTS

- **Chat Application:** (Work in progress)
 - Realtime android chat application user interface is developed using jetpack compose and ktor and stomp websocket client is used to establish connection with web socket and communicate with server.
 - Backend is implemented using springboot and database used is Postgresql. Spring Web Security and Websocket is used to implement authorization and establish bi directional connection between client and server.
 - GitHub link -
android app - /chatbox
Spring Boot microservice - /chat-app
- **Ecom Sathi Delivery Partner:**
 - Application enables user to onboard ecom as delivery partner and delivery center worker.
 - User have fill in details and upload require documents and images to submit their details for further process.
 - Face detection ml kit is use so that user cannot upload incomplete selfie which is one of the requirement.
- **Sathi App:**
 - Application is used by Field executive(F.E.) while they are delivering packages.
 - It keeps track of which shipment are delivered and which are canceled or undelivered.
 - Live Tracking feature enables control center to keep track of delivery partner and also restrict F.E. from updating package status out a certain distance from delivery location.

SKILLS SUMMARY

- **Languages:** Kotlin, JAVA, Dart
- **Frameworks:** Jetpack compose, Native Android, Flutter
- **Tools:** Git,Jetpack Library, Retrofit, Coroutines, Flows, MVVM, WorkManager, Android Componenets, Agile Methodology

EDUCATION

• Galgotias University

Bachelor of Technology - Computer Science and Engineering; GPA: 8.28

Greater Noida, Uttar Pradesh

May 2022
