

API Documentation for Ecom Express

Saathi App Payment Integration

Remote Paylink APIs

Create Paylink API

URL Demo : <https://www.ezetap.com/api/3.0/pay/createPaymentLink>

URL Prod : <https://demo.ezetap.com/api/3.0/pay/createPaymentLink>

Method: Post

Parameter Description:

Field	Data Type	Description	Mandatory
externalRefNumber	String	Reference number as provided by the merchant during the transaction. Note: If not provided, Razorpay POS will generate a unique number starting with "EZ"	Yes
username	String	Username of the merchant's user. If the user has logged in to an Razorpay POS application / device, this is usually the user's mobile number, else is as provided by the merchant during the transaction	Yes
amount	Double	Transaction Amount	Yes
appKey	String	appkey is shared by Ezetap for authentication (will be shared as part of the onboarding file)	Yes

customerEmail	String	Customer's Email Id	No
customerMobileNumber	String	Customer's Contact Number	Yes
remotePayLinkExpiryTime	Double	Expiry for Payment Link	Yes
automaticSMSPaymentLinkEnabled	Boolean	SMS Link Enablement	Yes

Request:

```
{
  "amount": 1400,
  "username": "<Enter username>",
  "externalRefNumber": "ext_100013566",
  "customerEmail": "",
  "customerMobileNumber": "",

UPI APIs

Generate QR API

URL Demo : <https://www.ezetap.com/api/2.0/merchant/upi/qrcode/generate>

URL Prod : <https://demo.ezetap.com/api/2.0/merchant/upi/qrcode/generate>

Method: Post

Parameter Description:

Field	Data Type	Description	Mandatory
amount	Double	Transaction Amount	Yes
externalRefNumber	String	Reference number as provided by the merchant during the transaction. Note:	Yes

		If not provided, Razorpay POS will generate a unique number starting with "EZ"	
externalRefNumber2 till externalRefNumber6	String	Merchant can provide multiple reference numbers during the transaction & they are recorded at Razorpay POS	No
username	String	Username of the merchant's user. If the user has logged in to an Razorpay POS application / device, this is usually the user's mobile number, else is as provided by the merchant during the transaction	Yes
appKey	String	appkey is shared by Razorpay POS for authentication (will be shared as part of the onboarding file)	Yes
customerMobileNumber	String	Mobile number of the customer.	No
customerEmail	String	Email id of the customer.	No
customerName	String	Name of the customer, either as entered by the merchant user or as read from the card used for payment	No

Request:

```
{
  "amount": 1000.00,
  "appKey": "770385a0-503f-496f-9ff7-0410b4c90cf3",
